Ecomadera Exportable  
**para la Agricultura**

# ¿Qué es exactamente ecomadera?

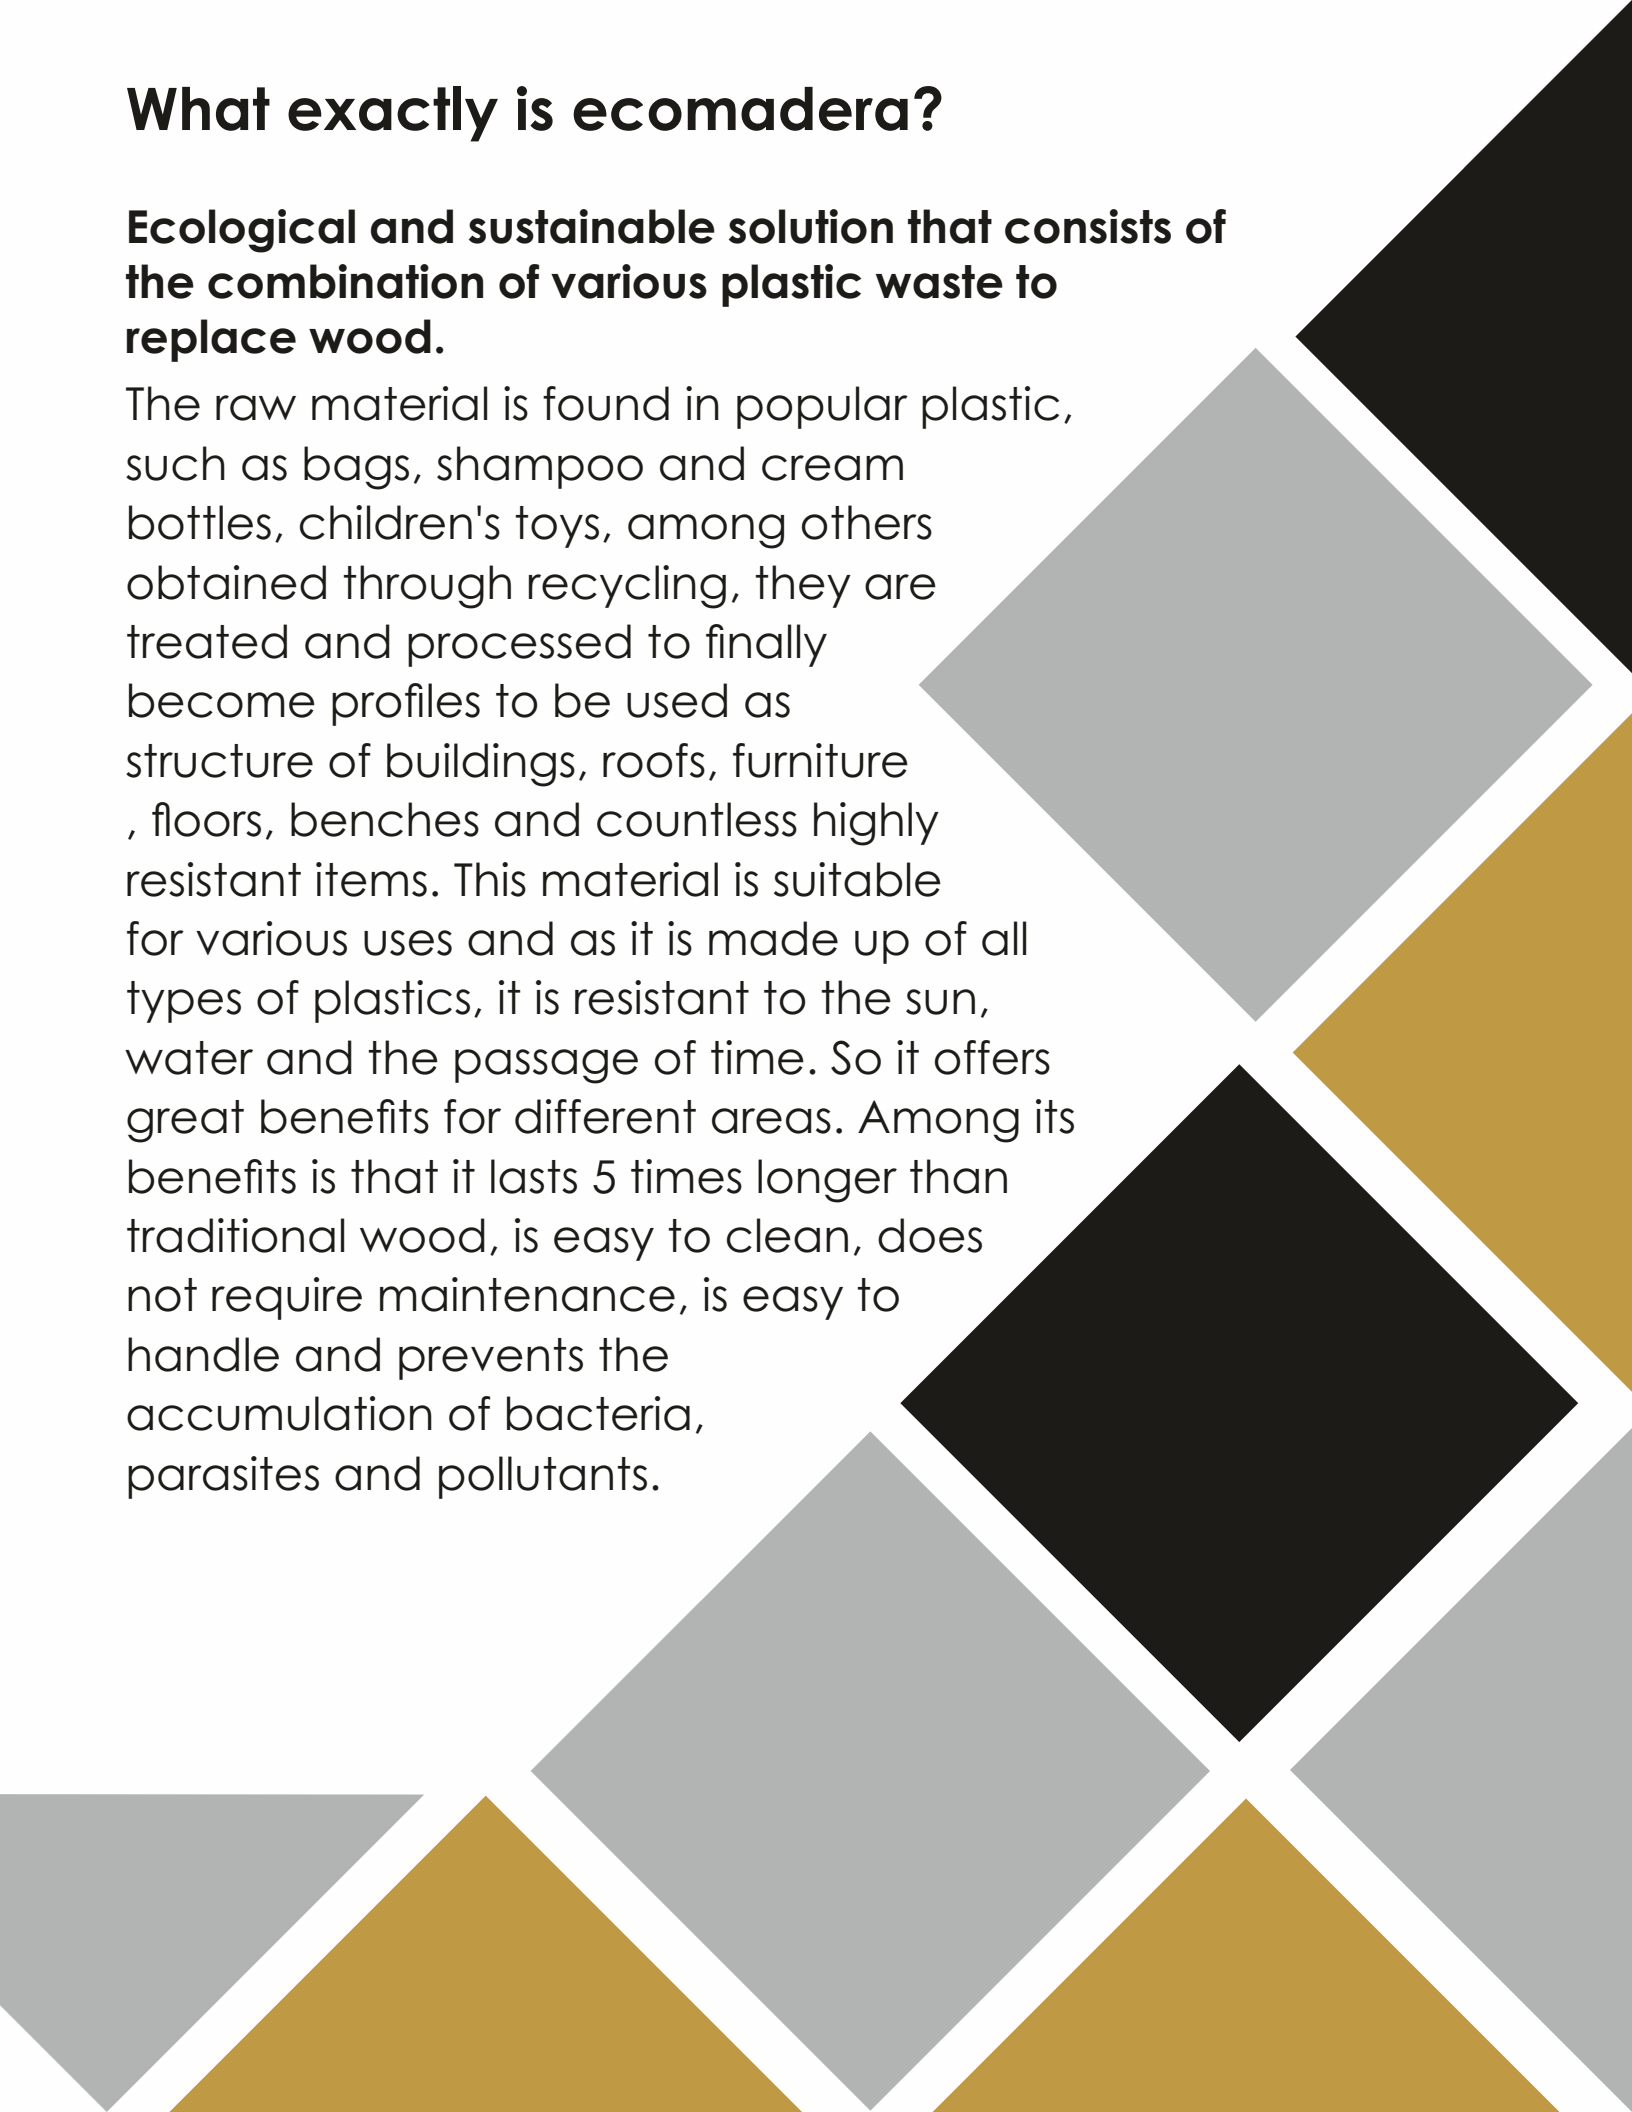

**Solución ecológica, sostenible y sustentable que consiste en la combinación de varios residuales plásticos para la sustitución de la madera.**

La materia prima es encontrada en el plástico popular, como bolsas, frascos de champú y de cremas, juguetes de niños, entre otras obtenida mediante el reciclaje son tratados y procesados para convertirse finalmente en perfiles para ser usados como estructura de edificaciones, techos, muebles, pisos, bancas e infinidad de artículos altamente resistentes. Este material es apto para diversos usos y al estar conformado por todo tipo de plásticos, lo hace resistente al sol, al agua y al paso del tiempo. Por lo que ofrece grandes prestaciones para los distintos rubros. Entre sus beneficios está en que dura 5 veces más que la madera tradicional, es de fácil limpieza, no requiere mantenimiento, de fácil manipulación y evita la acumulación de bacterias, parásitos y agentes contaminantes.

# What exactly is ecomadera?

**Ecological and sustainable solution that consists of the combination of various plastic waste to replace wood.**

The raw material is found in popular plastic, such as bags, shampoo and cream bottles, children's toys, among others obtained through recycling, they are treated and processed to finally become profiles to be used as structure of buildings, roofs, furniture, floors, benches and countless highly resistant items. This material is suitable for various uses and as it is made up of all types of plastics, it is resistant to the sun, water and the passage of time. So it offers great benefits for different areas. Among its benefits is that it lasts 5 times longer than traditional wood, is easy to clean, does not require maintenance, is easy to handle and prevents the accumulation of bacteria, parasites and pollutants.
